

MaterialApp Widget

`MaterialApp` is usually the **root widget** of a Flutter application. It sets up app-wide configurations like navigation, theming, localization, and routing.

✓ Important Properties of `MaterialApp`

1. `home`

- The default screen of the app.
- Typically a `Scaffold` widget.

```
MaterialApp(  
  home: Text("Flutter"),  
)
```

2. **title**

- A short description of the app.
- Used by the OS (e.g., app switcher).

```
title: 'My Flutter App'
```

3. **darkTheme**

- Theme used when the device is in dark mode.

```
darkTheme: ThemeData.dark(),
```

4. **themeMode**

- Controls whether light, dark, or system theme is used.

```
themeMode: ThemeMode.system,
```

7. **debugShowCheckedModeBanner**

- Shows or hides the “DEBUG” banner.

```
debugShowCheckedModeBanner: false,
```

Scaffold Widget

Scaffold provides the **basic visual layout structure** for a screen. Think of it as the skeleton of a page.

1. appBar

- Displays the top app bar (toolbar).

```
appBar: AppBar(  
  title: Text('Home'),  
),
```

2. body

- The main content area of the screen.

```
body: Center(  
  child: Text('Welcome'),  
),
```

3. **floatingActionButton**

- A circular button for primary actions.

```
floatingActionButton: FloatingActionButton(  
  onPressed: () {},  
  child: Icon(Icons.add),  
)
```

4. **drawer**

- A slide-in navigation panel from the left.

```
drawer: Drawer(  
  child: ListView(  
    children: [  
      ListTile(title: Text('Home')),  
    ],  
  ),  
)
```

5. **endDrawer**

- Drawer that opens from the right side.
-

6. **bottomNavigationBar**

- Navigation bar at the bottom of the screen.

```
bottomNavigationBar: BottomNavigationBar(  
  items: [  
    BottomNavigationBarItem(icon: Icon(Icons.home), label: 'Home'),
```

```
        BottomNavigationBarItem(icon: Icon(Icons.settings), label:
'Settings'),
    ],
),
```

7. **backgroundColor**

- Sets the background color of the screen.

```
backgroundColor: Colors.white,
```
